MARCH.

1920.

Occasional Notes.

Sports: March 31st. End of Term.

Summer Term begins Tuesday, April 13th.

Whitsuntide Holidays begin Thursday, May 20th.

School re-opens Tuesday, June 8th.

The Concert of the Musical Societies will be held in the Drawing Hall on Saturday, May 8th, at 7-30 p.m. Admission will be by programme (1/-). Programmes may be obtained from Form Monitors or from Mr. Arthur E. Jalland, Hon. Sec. O.M.A., during the fortnight preceding the Concert.

We hear that Major Charles Potts has resigned his post on the Staff, which he left during the war to take up work at the War Office. As boy and master he was at the School for fifteen years, and was practically the founder of our O.T.C. He leaves kindly memories behind him, and we wish him all success in his future work.

The election of C. Hignett (O.M.), of Corpus Christi College, Oxford, to the Ireland and Craven University Scholarships, announced at the end of last term, was in some measure crowded out by end-of-term topics, and has perhaps not received the full measure of publicity that it deserves. The Ireland Scholarship is the highest prize for Classical learning that is offered by the University, and has not been won by a Manchester Grammar School boy since 1903, when it was won by Leon Simon; previous to that it was won by F. H. Williamson (1897). Next to the Ireland ranks the Craven, and the winning of the two in the same year is an extremely rare event, and, we think, a record in the history of the School.

Those who wish to know something of the history of the School, and cannot go to the length of getting Dr. Mumford's book, may like to know that there are still some copies of the short history by Mr. R. D. Hodgson, once on the staff. They can be bought at the Receiver's office, price 6d.

We have received the following magazines:—St. Andrew's College Magazine, Edward Alleyn Magazine, Cliftonian Pauline (2), Queen's Royal College Chronicle, Boltonian, Liverpool Institute Magazine, Hulmeian, Sheffield Central Secondary School Magazine, Felstedian (2), Whalley Range High School Magazine, Keighlian (2), Leigh Grammar School Magazine, Batley Grammar School Magazine (2), King William's College Magazine, Gower, Taunton School Journal (2), Barrovian (2) Serpent, Harrovian (3), Portcullis, Tonbridgian (2), Bembridge School Newspaper. We regret that a number of the above mentioned magazines have not been previously acknowledged

Contributions, other than those relating to the O.M.A., will be received by Mr. A. S. Warman at the School.

O.M.A. Notes and O.M. Chronicle.

Mr. Orrie J. Knudsen was awarded the O.B.E. in December last, and in January was made a Chevalier of the Legion of Honour.

Capt. L. J. Schwartz, R.A.M.C., has been brought to the notice of the Minister of War for eminent services rendered in the North Russian campaign.

Mr. S. E. Evans, M.A., Musketry Staff Officer at the Scarborough Headquarters of the Yorkshire Coast Defences, was awarded the M.B.E. (Military Division) last June. He has been mentioned in despatches in February, 1917.

Mr. John A. Walkington has been awarded the Croix de Guerre.

Mr. A. J. C. Freshwater, M.C., has been appointed to the Administrative Staff of the League of Nations.

Capt. T. V. Sandys-Wünsch, of the Canadian North-West Mounted Police, had the honour of commanding the camp and escort of the Prince of Wales when he was duck-shooting. The Prince showed his appreciation of his services by presenting him with a cigarette case.

Professor G. Waterhouse has been appointed secretary to the Royal Commission appointed to enquire into the finances of Dublin University.

Mr. C. P. Brentnall, M.B., is now Resident Obstetric Officer at St. Mary's Hospitals, Manchester.

Mr. W. E. C. Jalland has been appointed Director of Education for Harrogate.

Mr. H. Roland Cooper has been elected a Fellow of the Economic Society.

Mr. H. B. Copinger has received a Civil Service appointment in the Colonial Office.

The Rev. H. Whitehead has been appointed Classical Form Master at Highgate School.

D. Budgett Meakin, of Highgate School (late of North Manchester School) has won a Classical Exhibition at Christ Church, Oxford.

Mr. T. B. Leigh was recently unanimously adopted as Liberal candidate for Stockport. Since then he seems to have withdrawn to help someone else.

Mr. G. E. Fasnacht had an article on "Rome and Persecution" in the *New Age* of January 22nd.

Dr. A. Mumford had an article on "The Standard of Physical Efficiency in Children" in the February number of *School Hygiene*.

H. H. Allen, S. C. Brown, and J. E. Pickering have passed the London Matriculation, Div. II.

In the Oxford University Sports, T. G. Standing was second in his heat for the Half-Mile. C. H. Davies was third in his heat for the hundred yards.

In the Cambridge University Sports H. Waterhouse was second in Putting the Weight.

Mr. Frank Greenwood's new etching of the Poets' Corner at the School is a masterly study of this picturesque spot, and should be of much interest to O.M.'s.

APPEAL.

Hospitals are suffering acutely from the present increase in cost of almost every item of maintenance (in many cases from 250 per cent. advance). At a recent meeting, convened and presided over by the Mayor of Salford, it was decided to institute a house-to-house collection in Salford and district on behalf of the Salford Royal Hospital. Voluntary workers are needed for this scheme, and it is hoped that some Old Mancunians or their wives will send in their names as workers. It is felt that no Old Boy resident in the Salford area will allow his Hospital to suffer from want of funds. Twenty-five thousand cases pass through the Hospital annually, and an additional income of at least £10,000 per annum is required to keep it working efficiently. Help is urgently needed.

N.B.—Will members please note that subscriptions should be paid to Mr. FRED ETCHELLS, Assistant Secretary, at the School, and that changes of address should be notified (also to Mr. ETCHELLS) without delay.

Obituary.

Mr. WALTER SPEAKMAN.

Mr. Walter Speakman, whose death occurred in January at the age of sixty-three, was at the School from 1868 to 1871. He had been secretary of the Manchester Chamber of Commerce for some years. Mr. E. F. Stockton, President of the Chamber, spoke of him on the occasion of his death as follows:

"By the death of Mr. Walter Speakman the commercial community of Manchester has lost a devoted and untiring servant. It has been my privilege to have been intimately associated with Mr. Speakman in his official capacity as secretary of the Manchester Chamber for some considerable time, and I am therefore very well able to judge the value of the services he has rendered to the trading interests of the city. Perhaps the outstanding feature of Mr. Speakman's character was an inborn gentility which no stress of circumstance or pressure of work ever succeeded in clouding over. I have rarely encountered a man who was able to maintain from day to day, year in and year out, so gentle and courteous a bearing towards his fellow-men. He was blessed with tact to an extraordinary degree, a qualification at all times of great value to those who have to deal with many conflicting interests.

"His work at the Chamber is more or less a matter of general knowledge, but I personally readily acknowledge how true and devoted was his support of the president in all matters pertaining to the work of the Chamber. I have no hesitation in saying that Mr. Speakman's long experience and willing assistance have rendered the heavy work of the office of President a real pleasure. There can be few men of whom it may be recorded that they have given thirty-five of the best years of their lives to the service of the commercial interests of the country. One has become so accustomed to associate the name of Walter Speakman with the Chamber of Commerce, and to connect his lovable personality with all its many activities, that it will be understood that until time has mellowed the loss the Chamber will hardly seem the same without him. Tributes to his memory have been received in great number from many parts of the country during the week, but it is a fact that no words can properly express the sorrow felt at the death of so kindly and able a man."

Mr. FREDERICK A. PRICE.

Mr. Frederick Arthur Price, Superintendent of the Gas Department, whose death occurred recently, in his 65th year, was a well-known official of the Manchester Corporation. Mr. Price

entered the service of the Gas Department of the Corporation 42 years ago. After filling one or two minor positions he was appointed assistant to the late Mr. Charles Nickson, and twelve years later—in June, 1909—he became superintendent. In referring to his death Alderman Kay, chairman of the Gas Committee, dwelt on Mr. Price's remarkable ability for "oiling the wheels" of the department and his success in managing a large number of officials with the least amount of friction. Mr. Price certainly had a full share of this ability, which also led him to take a keen interest in any movements for the well-being of the men about him.

He presented to the School a gas super-heating stove for the Chemical Laboratory.

Rev. I. G. SMITH, LL.D.

The *City News* of January 31st, announced the death, a fortnight previously, of the Rev. Dr. Isaac Gregory Smith, at Woking. He was the fourth son of Dr. Jeremiah Smith, High Master of the School, 1800-1837. Born in Manchester in 1826, he was educated at the School, and afterwards at Rugby, whence he went to Trinity College, Oxford. In 1846 he won the Hertford Scholarship, in 1847 the Ireland, and in 1848 was elected a Fellow of Brasenose. A rather lengthy list of his publications is given in *Who's Who*; he was also a well-known writer of hymns. The University of Edinburgh made him an LL.D. in 1886, and he was an honorary canon of Worcester. Since 1904, when he gave up the Rectorship of Gt. Sheffield, Bucks., he had lived in retirement, but still continued his literary work. It would be interesting to know if any of his contemporaries at the School are still alive.

The School Hugh Oldham Built.

(See frontispiece.)

(From an article by DR. MUMFORD in the *City News*.)

Through the kindness of Mr. Wm. Ellis, of Longsight, the School will in future possess a photograph of a drawing made about 1760 of the original Grammar School which Hugh Oldham built; a copy of the bill of costs expended between April 28, 1517-1519, has for many years been hung up in the Receiver's office.

This drawing was made by the well-known Manchester antiquary, Thomas Barrit (1743-1820). It passed into the collection

of pictures, posters, and play-bills made by John Greaves, the banker, which at his death was purchased by the overseers of Manchester. Thence the collection now known as the Greaves collection of MSS. (942.73. M. : 86) passed into the Free Reference Library of Manchester. The picture, like the similar pictures we possess of the 1776 school, was drawn to portray the ancient gateway of the college, which till 1820 possessed some fine carved armorial bearings of the Grelle and De la Warre family. It only incidentally contains the gable end, and not the doorway, of the original stone Grammar School built by Hugh Oldham in 1519, a brief reference to which is to be found in Edward Chessyre's famous school dinner song :

You have heard of great Manchester Town
Once famous for smallwares and cheek,
For fustians and cotton renowned ;
Some few studied Latin and Greek.
There stood an old building of stone
As big as a country church,
Grammar School it was called by the town,
And famed for Greek, Latin, and birch.

The building possesses much interest to all who care to recall the old traditions of the school. Unfortunately Hugh Oldham did not live to see the building completed, though he must have often passed through the gateway of the college to which the school was for so many centuries so closely attached. Perhaps, however, he planned the site, watched the measurement, and the laying of the foundations. In it were delivered the school speeches of 1640. From it decamped the Royalist High Master, Ralph Brideoak, to help in the defence of Lathom House.

Alongside the building and through the archway in 1649 marched Colonel Thomas Birch, with his soldiers, who, eyeing the portrait of Hugh Oldham, newly painted and adorned, at the end of the school, and inspired by a zeal not according to knowledge, pulled it down. "These men were more likely to pull down the schoolhouse also, than to imitate him in building such another" (Hollingworth). In 1660 forty young boys, clothed in white stuff, with plumes of feathers in their hats, and blue scarfs, and armed with little swords in their black belts, and pikes upon their shoulders, passed through this gateway to take part in the celebrations for the return to England of Charles II. In 1690, behind the closed and barricaded school doors, stood the school-boys, barring out their masters for a whole fortnight, shooting at the legs of those sent to reduce them to order, and being supplied with food by the inhabitants of the town. In the early part of the eighteenth century, when artful knavery had diverted for a while the income of the School Mill into private pockets, masters received no salary, the school was neglected, and for a

time actually closed. But on the conclusion of the great lawsuit with the Mosley family a large sum of money was refunded. Improved school income, together with better supervision, caused the school to be again well attended, and some, at least, of its boys followed the Jacobite parson, Rev. John Clayton—quondam scholar of the school and later one of the original members of John Wesley's Methodist Club at Oxford—when he crossed over Salford Bridge in 1745 to welcome "Bonnie Prince Charlie."

In spite of the restriction of the School Monopoly by Act of Parliament in 1758 the school made rapid growth, and soon became overcrowded. Consequently in 1776, after 260 years of service, the building was pulled down to make way for the more commodious brick building, often known as Lawson's school, which lasted till 1879, when in turn it was demolished to make way for the present gymnasium buildings.

It Should Not be Impossible.

[EDITORIAL NOTE.—*Whether the following passages are extracts from the forthcoming Report of the Inspectors who recently visited us, or whether they are not, we must leave to the judgment of our readers. Judging from the final proposal, we ourselves imagine that our leg is being pulled almost to dislocation.*]

Buildings, etc. A. To avoid congestion in the corridors and the hurly-burly methods of procedure from classroom to classroom, moving staircases and lifts should at once be installed in the School. It should not be impossible to have this done before the next inspection at any rate. It is unseemly that one of H.M. Inspectors should run the risk of incurring contusions and abrasions in endeavouring to make his way against the stream at the dinner-hour.

B. The opposite side of Long Millgate should be bought up and fives-courts built there.

C. All windows should open at the bottom to facilitate the defenestration of rowdy pupils.

Work. A. A general speeding-up and intensification of hustle is highly desirable. (We notice with regret that the High Master has been recently speaking authoritatively on the employment of leisure.) Much time is wasted, for instance, over the School dinner. It should not be impossible to provide the boys with nourishment in tabloid form, the School Medical

Officer carefully regulating the calories and vitamines contained in the tabloids, after receiving a full written statement from each pupil of what he had for breakfast. A special staff of clerks would tabulate the results in time for the Medical Officer to doctor the tabloids. (Note. We suspect that signs of somnolence in some of the teaching staff in the first afternoon period were due to the bulky fare at present provided.) By the tabloid system a great saving would also be effected in connection with the abstersion and cleansing of plates, etc., and some money would be available for the erection of the fives court already adumbrated. Motor-scooters should be provided for masters to get from one classroom to another. A lift would take Sixth Form boys straight from the dining hall to the library at 12-35.

B. We notice with regret that Correlation is not studiously cultivated in the School system of work. For a pupil or master to pass from one subject to another without any *liaison*, so to speak, must jolt the mental faculties injuriously. Everybody cannot expect to reach the level of the teacher who smoothly conducted a class from a physics lesson to a lesson on Shelley's poem, "The Cloud," by raising a cloud of steam from a boiling kettle; but it should not be impossible to approach within a reasonable distance of this high standard. For instance, a bridge might be formed between a lesson on Old Testament history and one on Mathematics, or *vice versa*, by spending the last five minutes of either lesson in calculating the average age of the patriarchs, or the measurements of Solomon's Temple.

C. Gramophones should be employed for dictating notes, and for illustrating history by means of songs, *e.g.*, Lillibullero and the Marseillaise. Visualisation is now a recognised aid to learning in most schools, but Auscultation has not yet come into its own.

D. Vocational training is not seriously undertaken. A youth aspiring to be a doctor should have some opportunity of acquiring a bedside manner; and it should not be impossible for a future bank-clerk to have some practice in manipulating treasury notes under the supervision of the Receiver.

Nature Study. We have nothing but praise for the admirable collection of stuffed mammalia and ornithological specimens, etc., now in the School; but it should not be impossible to keep on the premises *live* examples of Dame Nature. Boys should be encouraged to keep in their lockers rabbits, jack-daws, lizards, etc., reasonable precautions being taken

against their introduction into the classrooms, except when they could be used as illustrations of lessons. Fish could, of course, be introduced into the School Swimming Bath, sharks only after duly warning the Instructor.

General. A. To foster tradition—always difficult in a Day School—an examination in Dr. Mumford's History of the School should be passed by all candidates for entrance.

B. Once a month the School motto should be changed for another utterance of its inspired author—*Dulce est desipere in loco.*

It should not be impossible to proceed further—[Quite impossible. ED., *Ulula.*]

Tramway Work during the War.

We have been pleased to receive the following letter from the General Manager of the Salford Corporation Tramways:—

SALFORD CORPORATION TRAMWAYS,
32, BLACKFRIARS STREET, SALFORD,
20th February, 1920.

DEAR SIR,

I am desired by the Tramways Committee to state that they are very anxious to express their appreciation of the excellent services voluntarily rendered to the undertaking by a number of boys from your School, who acted as Trolley Boys during the latter portion of the war period. I may say that their conduct throughout was of excellent order.

It would be extremely difficult to thank the boys individually, and I have therefore to ask you to be good enough to convey to the scholars a general expression of appreciation from the Tramways Committee.

Yours faithfully,

G. W. HOLFORD,
General Manager.

The idea of volunteering for service on the trams originated with J. L. Fenton, then 14 years of age, in Sc.3 Form, who showed not only initiative but considerable gift for management in collecting the names and making the arrangements. When every able-bodied fellow in the senior school was doing some kind of war work, the lower school naturally did not want to be out of it. It was not altogether easy to co-ordinate the requirements of the tramway service with the dictates of the School doctor as to hours of sleep, and the School owes much to the courtesy and consideration of Mr. Holford.

Lectures.

Mr. R. W. JAMES' LECTURE.

In the short time at his disposal Mr. James, who was the physicist to Sir Ernest Shackleton's last expedition to the Antarctic, gave us a fascinating account of his experiences. Illustrating his lecture with exceptionally fine lantern slides, he showed us the daily humours and perils of polar exploration. He gave vivid descriptions of the critical position of the party after the "Endurance" had broken up,—a party of twenty-two men, hundreds of miles from land, living on ice which, drifting northwards all the time, was liable at any moment to break up. He described the futile attempt to cross the ice on sledges, and the arrival at Elephant Island after five or six days and nights in the small open ship's boats.

He related the story of continual misfortune by scientific descriptions of ice formations. What appealed to us chiefly, I think, was the ability of the party to see the humours of the situation, and no doubt this was due to the unfailing confidence of every man in their leader, Sir Ernest Shackleton, and the second-in-command, Wilde. He paid a striking tribute to each of these men; to the first, for his dauntless courage in the face of overwhelming odds, and for his daring journey over hitherto uncrossed mountains, a feat which will ever rank among the first in the annals of the Empire; and to the second, through whose energy and resource the marooned men on Elephant Island were able to "carry on" until help arrived.

Mr. James, late of St. John's College, Cambridge, on his return from the Antarctic, served with the Army in France as a sound ranger, where his services at Wytschaete Ridge in 1917 were the means of our casualties being considerably reduced. He is now lecturer in Physics at Manchester University. E. G. H.

On Wednesday, March 10th, M. Cammaerts gave us an extremely interesting lecture on Belgium. After describing his experiences in Antwerp just after the German had left it, and the incredulous joy of the populace at the Armistice, M. Cammaerts gave us an account of the marvellous energy shown by the Belgians in repairing the damage done to their industries, especially in regard to transport and metal-working. His account was illustrated by excellent slides. At the close M. Cammaerts recited his stirring verses called "Carillon."

Verse

AN ECHO OF A RECENT VISIT.

For one full week the pedagogic mind
 Receives wise counsel from expert directors;
 We're fated, wheresoe'er we look, to find
 Inspectors.

They steal upon us softly from behind;
 They play their parts as querulous objectors;
 They vanish. Just the traits we look to find
 In spectres! F. H. J.

A "SCOUT-STARMAN'S POEM." ORION.

Across the southern skies Orion strides,
 With shield and club in hand, with helm on head,
 With dagger dangling from his sparkling belt;
 He leads his trusty dogs, both large and small,
 Who eagerly do follow in his hunt,
 Past Taurus to his enemy the Bear.

H. N. HARGREAVE (M.R.)

Oxford Letter.

Dear *Ulula*,

Silence is golden, and the full record of our activities would more than suffice to fill the pages of this number. Still, we would not be accused of failing to offer our heartiest greetings and such of our news as we can here chronicle, however briefly.

First, as to our meetings. We have held the usual number each term, at which we have dealt with a wide range of matters, from discussing at inordinate length "the passing of speech" to drawing up a new set of rules. Two gatherings deserve special mention. On November 28th we held our annual dinner, an event celebrated with traditional heartiness in spite of the absence of the chief guest; our Vice-President, Mr. E. Barker, graciously acting as *hospes suffectus*. On February 7th we were favoured by a visit from members of the O.M.A. Literary and Social Section, a fixture renewed after an interval of seven years.

And now for the achievements of our members. In scholarship pride of place goes to Hignett's Ireland and First Craven; H. V. Styler, also of C.C.C., we congratulate on his honourable mention in the Junior Mathematical Scholarship. Our president for this term, W. C. Hankinson, left us

early in the term to take up a position in the Colonial Office. O.M.'s who rowed or coxed in the Torpids are too numerous to enumerate, but we may mention that we have one Captain of Boats, J. H. Thompson, of B.N.C. In other branches of 'Varsity life, H. G. Rhodes, of New College, and R. D. Wormald, of Balliol, figure as President and Treasurer of the O.U. Chess Club. T. G. Standing, of New College, is a leading member of the O.U.A.C., and G. H. Baxter, also of that College, besides figuring prominently at the Union, is President of the Stubbs' Society, and shines in the Moot Club and the O.U.N.T.A. The time is hardly ripe to speak openly of a new literary venture conducted by two O.M.'s.

Apart from these there are few of our members (and our numbers are now unprecedentedly large) who do not take some part in College and 'Varsity life, as is evidenced by the brilliant and varied selection of ties worn by them—from the chaste blue and purple of the Carlton to the bright and bibulous colours of the Stubbs, not to speak of many of more subtle hue. We count among our members innumerable holders of innumerable offices in innumerable college societies and clubs—literary, social and athletic.

But here our letter must end. May we in closing once again express our warmest greetings and good wishes.

THE OXFORD O.M.'s.

March 10th, 1920.

The following are the present Officers of the Oxford O.M. Society :

President: J. P. AINSCOUGH, Pembroke.

Hon. Vice-President: E. BARKER, M.A., New College.

Treasurer: G. HANDLEY, Jesus.

Secretary: T. A. RUSHWORTH, Merton.

Committee: T. HORN (Exeter), H. KENYON (Corpus), H. G. RHODES (New College), R. A. WHITTLE (Queen's).

Football.

SCHOOL v. Y.M.C.A.

Saturday, February 7th, at the Cliff. The Y.M.C.A. did not field a very strong eleven, and School soon began to gain the upper hand. It was not long before Shimmin got through, and once a start was made the goals came at fairly regular intervals. A half-time lead of five clear goals was increased to a final score of 9—0 in favour of School. Scorers: Shimmin, 5; Hobson, 2; Jacques, 2.

Team: Kirsop; Windsor, Sharp; Whitehead, Blake, Kemp; Tarbett, Hobson, Shimmin, Jacques, Gilchrist.

SCHOOL v. SALFORD TECHNICAL INSTITUTE.

Wednesday, February 11th, at Swinton Fields. This game was played under difficult circumstances owing to the slope and sodden nature of the ground. School first had the advantage of the slope, and the home team took the ball straight into our half, whence after a goalmouth scramble they were

at length repulsed. It fell to School to open the scoring, as the result of a wing movement, but the lead was not retained long, for almost straight from the kick-off the Tech. took the ball up the left wing and equalised. The score at half-time was 1—1. Resuming immediately, there was a protracted period of mid-field play, the ball swinging freely from side to side, but eventually the home team again scored. For a long time School could not make any headway, but at length, late in the game, Shimmmin equalised. The game was fiercely contested, but there was no further score, though Hobson once came very near winning the game, putting the ball into the goalkeeper's hands from short range. Result :—

School, 2; Salford Tech., 2.

Team : Kirsop; Windsor, Sharp; Fowler, Blake, Kemp; Whitehead, Hobson, Shimmmin, Jacques, Gilchrist.

SCHOOL v. ST. BEDE'S.

Saturday, February 14th, at Alexandra Park. A ground heavy with the recent rain prevented any possibility of delicate foot-work, and the result of the game depended more on the dash than the science of the team. School defended the entrance goal, and started strongly and keenly. It was not long before the absence of Turner and Tarbett was felt, and, though the School defence was sound, the forwards could not move rapidly in the centre, and the wing men lacked speed. The opening goal came to School, Hobson beating the home goalkeeper with a nicely-placed shot. The lead was soon taken from us, the St. Bede's centre forward equalising with a magnificent shot from a considerable distance. The play was still very even, and both sides missed chances of scoring; once, when Shimmmin had the ball and a goal seemed certain, the goalkeeper rushed out and, almost by a miracle, managed to pick the ball off his feet. Some time later St. Bede's again scored, this time as the direct result of a free kick which seemed to be a mistaken judgment on the part of the referee. Before the game closed, the home goal had one or two narrow shaves, but the final score remained :

School, 1; St. Bede's, 2.

Team : Kirsop; Windsor, Sharp; Whitehead, Blake, Kemp; Fowler, Hobson, Shimmmin, Jacques, Gilchrist.

SCHOOL v. HULME G.S.

Saturday, February 21st, at the Cliff. The game had long been looked forward to because of the defeat suffered at Hulme's hands last season. The game opened at a quick pace, and in the first ten minutes, before the School defence had settled down, the visiting forwards had penetrated it no less than three times, scoring, however, only once. Soon the School eleven got going and the visitors' goal had a warm time. Before long Hobson took the ball up and scored a splendid goal which left the defence helpless, but unfortunately had to be disallowed for offside. Undismayed at this setback, the School attack kept up a spirited, if rather loosely-jointed, bombardment of the river goal. Success came at length, and Hobson scored with a ground shot. Half-time score : School, 1; Hulme G.S., 1.

In the second half the pace increased, and the game went on furiously. Neither side gave any chance, and it seemed that the game was destined to be a draw. The Hulme forwards were bottled up most of the second half, and the School forwards did not seem to be able to make any headway. When

there was still only a minute to go the score was still 1—1. And then a sudden change came. Whitehead at outside right got hold of the ball, and put in a perfect centre, which Jacques headed through in fine style. Result :

School, 2; Hulme G.S., 1.

Team : Kirsop; Windsor, Sharp; Fowler, Blake, Kemp; Whitehead, Hobson, Shimmin, Jacques, Gilchrist.

SCHOOL v. COLLEGE OF TECHNOLOGY.

Wednesday, February 25th, at The Firs. The referee unfortunately failed to put in an appearance, and the game had perforce to be carried on in somewhat arbitrary fashion. Each side scored once, but both goals were disallowed for offside. Score :

School, 0; College of Technology, 0.

Team : Kirsop; Windsor, Sharp; Fowler, Blake, Kemp; Whitehead, Hobson, Shimmin, Jacques, Gilchrist.

SCHOOL v. BURY G.S.

Saturday, February 28th, at Bury. For about twenty-five minutes the game was more or less evenly contested, School scoring once. Afterwards, however, the home team went utterly to pieces, and the score at half-time was 5—0. In the second half School had all its own way, and amassed a total of eleven goals. Result :

School, 16; Bury G.S., 0.

Scorers : Shimmin 8, Hobson 5, Whitehead 1, Kemp 1, Blake 1.

Team : Kirsop; Windsor, Sharp; Fowler, Blake, Kemp; Whitehead, Hobson, Shimmin, Baker, Johnson.

SCHOOL v. WEASTE CONGREGATIONAL.

Saturday, March 6th, at the Cliff. The ground at the beginning was firm and dry, and gave every promise of a good game. The teams were evenly matched, and a fast game ensued, with the ball swinging rapidly from end to end. Shortly after the start, rain began to fall, and the ground changed from a firm surface to a sticky and slippery mess. The quality of the play was naturally affected, but it could not damp the keenness of the teams. During the first half Shimmin got through for School, shortly before the whistle blew. Half-time score : School, 1; Weaste, 0.

On resuming, School showed greater stamina, which became still more manifest in the later stages of the game. For some time the visitors' goal was subjected to a violent attack, from which it had several lucky shaves, Blake, Gilchrist and Whitehead each hitting the crossbar within a minute. After about a quarter of an hour a determined rush gave the Weaste team an equalising goal; and School took the ball straight down from the centre and gave School the lead again. A few minutes later Shimmin increased the lead with a splendid individual run. By this time the visiting forwards seemed to be about played out, and a very enjoyable game closed with a score of 3—1 in School's favour.

Team : Kirsop; Windsor, Sharp; Fowler, Blake, Kemp; Whitehead, Hobson, Shimmin, Jacques, Gilchrist.

Lacrosse.

The following boys were awarded colours at Christmas :

1st TEAM COLOURS :

Barker, N. (Science Transitus).
 Mayor, A. L. (Science Transitus).
 Wilson, L. (5d).

2nd TEAM COLOURS :

Attenborough, J. P. (Cl. VI.).
 Blake, D. C. M. (Sc. Vi.).
 Jeans, T. J. (Sc. VI.).
 Gibson, J. (Sc. VI.).
 Fielden, E. T. (Sc. Trans.).
 Molyneux, L. R. (Sc. Trans.).
 Exley, A. A. (Rβ).
 Barker, K. (4d).

M. G. S. v. BARTON HALL "A."

January 24th, at Barton Hall. At the start of this game we were rather handicapped owing to Blake being unable to play, and the fact that Mr. Hartley arrived late. However, in the first half our defence held their men very well, Deacon in particular. The fact that the attacks were a man short and that they were also short of Barker, who is a great asset to the attack, made a great deal of difference. Half-time score : Barton, 4 ; School, 1.

In the second half our attack improved, but they were playing against a strong wind and so they soon tired. Fielden played very well, but did not receive enough support. Result :

Barton, 12 ; School, 2.

Team : Wilson, Mr. Hartley ; Deacon, Berry, Jeans, Mitchell, Tomson, Exley, Fielden, and Molyneux.

M. G. S. v. COLLEGE OF TECHNOLOGY.

January 28th, at Fallowfield. This proved to be the best game we have played with the College. Although we were without Barker (N.) and Fielden, we were able to force a draw. The College opened the scoring, and soon after Mr. Hartley equalised. The play was very even up to half-time, when the College were leading.

In the second half School played briskly and were soon leading by three goals ; however, the College played strenuously and managed to draw level just as the whistle blew. Blake played well on the defence, and Molyneux was responsible for three goals on the attack. Result :

School, 9 ; College of Technology, 9.

Team : Wilson, Deacon, Berry, Jeans, Mr. Hartley, Blake, Tomson, Mitchell, Gibson, Smith, Exley, and Molyneux.

M.G.S. v. STOCKPORT G.S.

February 11th, at Fallowfield. The game opened briskly, School doing most of the attacking, and after some good passing Barker (K.) ran in and

scored. Soon after Exley ran through on his own and scored a good goal from the side. Smith obtained the ball behind goal and passed to Tomson, who in turn passed to Exley, who once again scored.

In the second half Stockport opened with great determination and kept School on the defensive. Stockport succeeded in scoring, and although Exley scored again, Stockport were soon two goals ahead. Then School woke up and kept an insistent attack on their goal, which in the end enabled us to draw level, and just on time Molyneux put us ahead from a pass in front of goal. Barker (K.) showed great improvement, combining well with his fellow attacks. Exley played a good game, scoring four goals. Result :

School, 8 ; Stockport G.S., 7.

Team : Gibson (G.), Deacon, Berry, Jeans, Blake, Smith, Tomson, Mitchell, Gibson (J.), Barker (K.), Exley, and Molyneux.

SCIENCE AND MATHEMATICAL SIDES *v.* MODERN AND CLASSICAL SIDES.

March 11th, at Fallowfield. J. F. Tomson and L. Wilson captained the respective sides. Tomson won the toss and played with his back to the sun. Play opened in favour of the S. and M.'s, and Tomson opened the scoring. Soon after Blake, coming up from the defence, ran through five men, including the goalkeeper, and scored another for the S. and M.'s. Then the M. and C.'s woke up and gave a display of good passing, Barker (K.) playing brilliantly. Then Exley, who was also playing well, scored from the M. and C.'s, and soon after they equalised through Carlisle. Just before half-time Exley scored again for the M. and C.'s. Half-time score : M. and C.'s, 3 ; S. and M.'s, 2.

On resuming the play was evenly balanced, and soon afterwards Fielden scored for the S. and M.'s, and then Johnson scored for the M. and C.'s. When Exley registered his third goal, things began to look bad for the S. and M.'s. However, Tomson ran through and scored, and, as the result of some good passing between Tomson and Barker (N.), Barker equalised. The M. and C.'s were now trying hard to keep the S. and M.'s out, but just on time Fielden scored the winning goal. Result :

Science and Mathematical Sides, 6 ; Modern and Classical, 5.

Science Team : Crook, Deacon, Berry, Jeans, Blake, Atkinson, Tomson, Barker (N.), Gibson, Waterfield, Fielden, and Molyneux.

Modern Team : Wilson, Shaw, Suringar, Hardy, Palmer, Mitchell, Smith, Worthington, Exley, Johnson, Barker, and Carlisle.

OTHER RESULTS.

M.G.S. 1st, 4 ; Heaton Mersey " B," 12.

M.G.S. 1st, 2 ; Hulme G.S., 24.

M.G.S. 1st, 8 ; Disley " A," 2.

M.G.S. 1st, 4 ; Blackley Park, 6.

M.G.S. 2nd, 2 ; Hulme G.S., 10.

M.G.S. 2nd, 6 ; Wacoboys " B," 9.

M.G.S. 2nd, 9 ; Heaton Mersey, 9.

M.G.S. 2nd, 10 ; Cheadle Hulme " C," 0.

M.G.S. 2nd, 4 ; Urmston " B," 1.

Harriers.

The first run of the term was from Sale High School on January 17th. V ran by Baguley Brook for about a mile, then turned to the right, ran over the fields, crossing Brooklands Road, until we reached the Altrincham Road. Turning to the left we ran along the road for some distance, then leaving the road, we passed through a wood, again reaching Brooklands Road. From here we made straight for Sale, and spent a pleasant twenty minutes running up and down the streets looking for the school.

On January 24th we ran from Didsbury Sunday School. The trail followed the bank of the Mersey for about a mile, then turned to the left and went towards the railway. Regaining the river bank it kept to it for some distance then, re-crossing the railway, made for home.

On January 31st we ran from North Manchester School with the O.M. Harriers. Green (O.M.) and Stirling were the hares. The trail followed, at first, the main, the North Manchester Steeplechase course, and most of the pack kept on the course, failing to notice that the trail led to Heaton Park. After the run Mr. Dennis very kindly provided tea, which was followed by some choruses from the School song book.

On February 7th we ran from South Manchester School. Rigby and Griffith were the hares. We followed a trail which led straight through the fields in the direction of Hans Renold's works, and after going in a circle returned the same way. The hares were kept in sight nearly all the time and were caught by Stourton (O.M.), and Trickey (Sh.B), the latter running very well.

The run on February 14th was from Didsbury Sunday School with the O.M.A. Harriers. Most of the country was flooded, and we were forced to wade knee-deep to reach the river bank. We followed the river for over a mile, then, to avoid further aquatic exercise on our way home, we kept to the metalled roads.

On February 8th we ran from Blackley with the H.O.L.C. Harriers. For some distance the trail led us through a maze of streets, but later took us over open country in the direction of Heaton Park. This run was to decide the H.O.L.C. championship, and there was some very keen running in the pack. Of M.G.S., Hopley came in first.

Steeplechase.

The Steeplechase took place on Saturday, March 13th, over the usual course. The results are as follows:—

Senior.—1, G. S. Rigby, M.T.6; 2, J. F. Tomson, Sc.IV.; 3, D. Hopley, Ra; 4, C. B. Taylor, Sc.VI.; 5, W. Hobson, M.T.a.

Junior.—1, G. A. Mangoletsi, 4b; 2, F. E. Johnson, R.β; 3, A. B. Trickey, Sh.B; 4, R. A. Roberts, 3c; 5, C. H. Ingham, iv.γ.

Twenty-seven seniors qualified for limit marks, and forty-four juniors.

Boxing.

The heavy-weight championship was won by H. Pigott, Cl.V., and the light-weight championship by J. Potter, Sc.V.

Literary Society.

A meeting of the Society was held on Tuesday, February 3rd, when Corney read a paper on Matthew Arnold's Poetry. The essayist pointed out that the poems of Arnold have a Greek lucidity but not a Greek acceptance of life. The importance of Arnold's poetry lies in the fact that it reflects the thoughts of the Victorian Age. The audience appreciated the extracts which were read out, and the short pointed comments which were made. The meeting closed after an exceedingly interesting discussion in which everyone present took part, including one of H.M. Inspectors.

A meeting was held on Tuesday, February 17th, when Hyman read a paper on "Tolstoi." The essayist traced the history of Tolstoi's life from his birth in the depths of the country in 1828, through the stormy period of his youth, and the enormous activity of his later life, up to his most tragic death in 1910. The manifold activities of Tolstoi were mentioned; his interest in all social and religious problems, in education and in folk-lore. Besides reading a few extracts from his novels (one extract being chosen from Anna Karenina, the greatest novel in the world's literature), the essayist illustrated Tolstoi's life by extracts from the author's diaries and confession. Mr. Warman made some very wholesome remarks on Tolstoi's ideas on social problems.

A. H.

Junior Debating Society.

REPORT OF MEETINGS OF JANUARY AND FEBRUARY, 1920.

The President, Mr. Collinge, took the chair at each meeting.

January 30th.—Stern moved the time-worn motion, "That competitive examinations should be abolished." He explained that they encouraged underhand methods. He seemed to be well up in the art himself, and went into many details. Kershaw opposed, saying that until a suitable substitute was brought forward we must carry on. Other speakers were Morriss, Wilkinson, Poulter, and Tyson. On division the motion was defeated by 12 votes to 8.

February 6th.—Webber moved "That this House demands the Total Prohibition of Intoxicating Liquors in this country." He quoted the words of De Quincey, "Drink expenditure is made at the cost of efficiency," and pointed out the serious need for a good substitute for the public house. Blore opposed, thinking that we should find a mean between the two extremes. He wished to retain drink in the same manner as food-stuffs. Hitchens, Griffiths, Kershaw, Morriss and many others also spoke. The motion was carried by 21 votes to 12.

February 13th.—Kershaw moved "That I.O.T.H., communication with Mars and other planets is perfectly feasible." He was confident that the wireless messages recently received *did* come from Mars and were not due to any atmospheric disturbance. Tyson, opposing, pointed out that the Martians would require an instrument about eight times as powerful as any in existence to be able to communicate with our planets. Other speakers were Benson, Button, Varley, Pearce, Griffiths, Morriss, and Dale. The motion was defeated by 9 votes to 11.

February 20th.—Morris moved "That the time has now arrived when every civilised nation should be a democratic Republic," pointing out the fabulous expense incurred by a Monarchy. Griffiths opposed in a fervid speech. The President then addressed the House and, in a very eloquent speech, pointed out the glories of Republicanism. Hitchens, in an excellent speech, pointed out that the King is a free agent, not bound by party politics. Many other excellent speeches were made by various members, and at 5-12 the House divided, when the motion was lost by 10 votes to 20.

February 27th.—An impromptu debate was held on this date, though it would be tedious to describe even the substance of the seventeen-odd subjects discussed. McKeone thought that Turkey in Europe should belong to the League of Nations. To illustrate the variety of subjects, the next debate was on the vital question "Is a tomato a fruit or a vegetable?" which Buttorf had to answer. In face of the fact that there is such a thing as a law of liberty it would be unwise to quote Hardman's statements *re* Cox's dinners. Morris affected ignorance when asked the question, "Is the present-day girl preferable to the girl of the Puritan age?" None of these questions were put to the vote.

E. WILKINSON, *Hon. Secretary.*

Philosophical Society.

On January 28th a paper was read by Windsor on "The chemical action of light." The lecturer gave an interesting account of the development of Photo-chemistry, and illustrated the more salient points by well-chosen experiments, performed by the light of the electric arc.

On February 13th about 30 members of the Society paid a visit to the works of the Lancashire Dynamo and Motor Company, Trafford Park. By the kindness of Mr. C. P. Bramley, the members spent about one and a half hours in the works and were then entertained to tea. The sincerest thanks of the Society are due to Mr. Bramley for affording us the pleasure of the visit.

On February 27th the Secretary gave his paper on "Dyes;" previously read in 1918.

On March 10th a lecture was given by Mr. Hughes on the "Manufacture of Nitro-glycerine." The lecturer, who has had very considerable experience in this work, gave comprehensive details of the various purifying, nitrating and wasting processes, and of the precautions and devices necessary to prevent accidents. The paper was extremely interesting and lucid, and enlivened by several personal anecdotes.

Music Study Circle.

January 31st.—The first meeting of the term, and the first of an exceedingly attractive syllabus, was held in the lecture theatre, when Miss Winifred Mitchell gave a lecture recital on "Famous Fiddlers and Curious Compositions," Miss A. M. Mitchell presiding at the piano. Instances of curious

compositions were given, from the first violin piece known, to the latest of nineteenth century composers. The programme was long and varied, and the attention and applause thoroughly testified to the high quality of the lecture.

Programme.—Earliest known Violin Solo, "Romanesca"; Italian School: "Follia" (*Corelli*), "The Devil's Trill" (*Sartini*), Caprice on G String (*Fiorillo*); German School: "The Bee" (*Schubert*), "Elegie" (*Ernst*); French and Belgian Schools: "Hilarite" (*Vieuxtemps*), "Zigeunerweisen" (*Sarasate*), "The Strolling Player" (*Wieniawsky*); Composers who adapt: "Farewell to Cucullain," "Fiddle Mendin'," "Fantasia on Irish Airs"; Farmyard Composers: "The Bird in the Tree," "The Drum," "The Witches' Dance"; Lady Fiddlers: "The Bluebottle on the Window," "Berceuse."

February 6th.—An open meeting was held in the Drawing Hall, when Mr. Edward Isaacs gave a lecture-recital on the "Pianoforte Study or Etude." A short sketch was first given of the development of the piano from the earliest forms to the present-day elaborate grand piano, and it was remarked that it was obvious from the works of some of the earliest composers that they were severely handicapped by insufficient length of keyboard. Mr. Isaacs expressed the opinion that it was perfectly legitimate to reconstruct some of the pieces of these early composers, to suit the requirements of the modern pianoforte, as these musicians could have made good use of another octave or two. Mr. Barnes, in closing the meeting, expressed the opinion of all in saying that, although Mr. Isaacs had displayed a marvellous technique and a prodigious memory, we had seen but a small portion of his great talent.

Programme.—Two Harpsichord Pieces, (a) Allegro in B flat, (b) Allegro in D major (*Scarlatti*), Study from "Gradus ad Parnassum" in F minor (*Clementi*), Three Studies from the "Eighty-four Studies" (*Cramer*): (a) in C major (hand extension), (b) in G major (left hand technique), (c) in B major (trills or shakes); Three Studies from the "School of Finger Dexterity" (*Czerney*): (a) in B flat (rapid scales), (b) in F major (bravura arpeggios), (c) in A flat (light and flying passages); Study in F major from the "Octave School" (*Kullak*); Study in D minor, Opus 70, No. 6 (*Kullak*); Three Studies: (a) in A flat (posthumous), (b) in G sharp minor, Op. 25, (c) in C sharp minor, Op. 10 (*Chopin*); Two "Etudes de Concert": (a) in F minor, (b) in D flat major (*Liszt*); Staccato Study (*Rubinstein*).

February 20th.—A meeting was held in the large lecture theatre, when Mrs. Kenneth Lodge gave a lecture-recital on "Grieg and what to look for in his music." A short sketch of the music of Grieg was first given, and it was remarked that Grieg was a composer who first chose his title and then wrote music to interpret that title. The result of this kind of work is to be seen in his numerous lyric pieces.

Programme.—Song, "Monte Pincio"; Pianoforte Solo, Ballad; Song, "Drifting"; Pianoforte Solos, (a) Lyric Pieces: "To the Spring," "Butterfly," (b) Peer Gynt, "Morning Song"; Songs, "Brown Eyes," "The First Primrose," "The Swan"; Pianoforte Solo, "Holberg Suite."

March 5th.—This meeting offered an excellent contrast to the meetings previously held this term, when the members of the musical societies gave an ambitious programme on "Haydn and Mozart." The lives of the composers were first outlined by Mr. Lob, and their chief works were mentioned. The long and varied programme says much for the revived activities of our musical societies. The orchestra, under the able leadership of Cohen, gave an excellent rendering of the Haydn minuet and the selections from "The Magic Flute";

but the Mozart Sonata, which was so splendidly played by Johnson and Fuchs, and the songs by Roberts and Jennett, were perhaps the most appreciated of all the items.

Programme.—Haydn: (i.) Piano Duet, Allegro from "La Reine" Symphony, Largo from Symphony No. 13, W. Johnson and S. G. Corbishley; (ii.) Minuet from Symphonies No. 7 and No. 2, the Orchestra; (iii.) Trio for violin, 'cello, and piano, W. L. Cohen, R. Whittington, S. G. Corbishley; Mozart: (iv.) Piano Duet, Allegro from G minor Symphony, S. G. Corbishley and W. Johnson; (v.) Soprano Duet, "When the western breeze is dying," A. Eliot and L. Jennett; (vi.) Rondo from Sonata, E. Fuchs and W. Johnson; (vii.) Bass Solo, "Now your days of philandering are over," I. J. Roberts; (viii.) Trio for violin, 'cello, and piano, W. L. Cohen, R. Whittington, and S. G. Corbishley; (ix.) Soprano Solo, "Say ye who borrow love's witching way," L. Jennett; (x.) Selections from the "Magic Flute," the Orchestra.

March 12th.—The meeting was held as usual in the large lecture theatre, when the Rev. C. P. Keeling, assisted by Mrs. Heap, gave a lecture-recital on Schumann's Vocal and Pianoforte Works." At this meeting we were again reminded of the fact that the school piano was in a condition to be placed upon the retired list.

Programme.—"Wiegenlied" (1843), Impromptu (1838), "Aufschwung," "Warum" (Op. 12), Romance and Scherzo from "Faschingsswank aus Wien," Op. 28, "Paganini Caprice," No. 2, Op. 3, Songs, "Out over the Forth," "I will not grieve," "The Rose and the Lily," "The Month of May"; Noveletten, Op. 21 (1838): No. 1 in F major, No. 4 in A major, No. 7 in E major; Songs, "The far-off Land," "The green hat" (Volkslied), "Devotion"; Kreisleriana, Op. 16 (1838): No. 2 in B flat, No. 5 in C minor; Pianoforte Duets, Op. 68 (1848), "Bilder aus Osten"; Nachstücke Op. 23 (1839), No. 3 in D flat, No. 4 in F major.

Astronomical Society.

The Society met on Thursday, February 12th, in Dr. Bruton's room, the Secretary being in the chair. After the minutes of the previous meeting had been dealt with, Chew was, on the proposal of the Secretary, elected unanimously to the post of chief curator of the telescope. Chew next commenced his paper on "How to make some inexpensive telescopes." He told his audience, which numbered thirty, the way in which he had made a 2½ in telescope by substituting cardboard for brass in its structure. Some slides made by himself, and a specimen telescope were used to illustrate the process. He also described a 1 in. telescope, the cost of which is well under 1/-.

The next meeting took place on February 26th. Barlow gave a lecture on "Transits." He dealt fully with the theory of transits and illustrated his description by a slide. By an excellent series of slides, made by Chew, he explained transits of Venus and Mercury. The phenomenon of the "black drop" was treated at length, five slides being shown. He announced in conclusion that the next transits would take place in the years 2004 and 2012. The meeting, numbering some twenty-five, broke up about 4-15.

On March 11th another meeting was held, when Richardson lectured on the Einstein Theory. The attendance, some ten, was very poor, but Richardson's lecture, which was excellently composed and delivered, suffered little

The theories of the ancients, he said, as to the nature of light, are altogether different from our own. All Newton's discoveries and theories were based upon the assumption that light was unaffected by gravity. By observations made during last year's solar eclipse, light rays from the stars were found to bend as they passed the sun. The bend could only be accounted for by the supposition that light had weight. This theory clears up many doubts of astronomers. The meeting concluded about 4 p.m. J. D. KERSHAW.

League of Nations Society.

It has been decided to form a League of Nations Society in the School. The Society will be divided into two branches, the lower branch to consist of all boys below the Sixth; the upper branch to consist of Sixth Forms. The High Master has consented to become President of the Society. The general secretary is to be J. D. Kershaw Mod. 6 (ii.), the Chairman of the Senior Group Mr. Cox; the Secretary, N. M. Jacobs, Mod. 6 (i.); the Chairman of the Lower Group, Mr. Rivers; Secretary, E. Wilkinson (iv.a).

A general meeting of the members of the Sixth Forms was held in the Prefects' Room on Thursday, March 11th, Mr. Cox in the chair. Short papers were read by Jacobs, Scragg and Mr. Cox on the evolution and aims of the League of Nations, and on the objects which the School Society has in view.

It was decided that the work of the members of the Senior Branch would be to endeavour to put before the School various aspects of the League, to be followed by debates. It was also proposed that debates be held with Schools situated in the neighbourhood. The next general meeting is to be held on Monday, April 19th, when the Committee hope to secure the presence of some public speaker.

JUNIOR GROUP.

Two general committee meetings of this group of the Society have been held, and the following decisions have been made:

1. That the aim of this Society is to arrive at a knowledge of the work and ideals of the League of Nations, and to arouse the interest of others in the same.

2. That E. Wilkinson (IV.a) be Secretary; T. H. Hitchens (5a) Treasurer; P. C. Varley (4a), L. A. Morris (4d) Executive Committee.

3. That a society badge shall be designed.

4. That an optional subscription be asked for, maximum 1/-.

5. That an open meeting be held on March 18th. Speaker, Mr. P. Butlin.

6. That a tea be held on March 30th, to be followed by a debate.

7. That an attempt be made to have League of Nations Society representatives in school camps.

Old Mancunians Association.

NEW MEMBERS (SINCE LAST ISSUE OF "ULULA").

1918	Birch, Herbert A.	118, George Street, Cheetham Hill
1919	Chatterton, William T.	11, Halstead Avenue, Pendleton
1920	Clayton, Alan B.	10, Eastnor Street, Old Trafford
1920	†Colebourn, Frederick D. (Junr.)	Eastholme, Prestwich Park, Prestwich
1919	Cowham, Arthur T.	241, Great Cheetham Street, Hr. Broughton
1919	Crossley, Thomas A.	40, Goodman Street, Blackley
1918	Cruikshank, Robert D.	2, The Priory, Higher Broughton
1919	Gillibrand, Wm. B. M.	School of Mines, Camborne, Cornwall
1919	Halstead, Frank	Park Cottage, The Ridge, Burnley
1918	Heaton, Edward P.	8, Lord Street, Fallowfield
1881	Hockmeyer, William	Highfield Lodge, Heaton Mersey
1919	†Jordan, Frederick C.	154, Upper Brook St., Chorlton-on-Medlock
1919	Kemp, David	16, Balfour Road, Southport
1916	Manyon, Leonard	125, Parrin Lane, Monton
1917	Methven, William	52, Wellington Street West, Hr. Broughton
1918	Monks, Alfred T.	50, Bradford Street, Haulgh, Bolton

Registered Alterations and Changes of Address.

1907	Ashworth, A. T.	Egerton, Whitefield Road, Ashton-on-Mersey
1901	Barlow, J.	Brynawel, New Brook Road, Atherton
1883	Barratt, Shirley	20, Athol Road, Alexandra Park, Manchester
1904	Behrens, Leonard F., M.COM.	160, Wellington Road, Withington
1890	Bone, Cyprian H.	19, Cedars Road, Beckenham, Kent
1909	†Booth, William	4, Cliff Grange, Bury New Road, Higher
1896	†Casdagli, X. E.	Springfield, Kersal [Broughton]
1907	Coates, Herbert	The Grove, Mill Hill, London, N.W. 7
1917	Coop, Guy C.	38, Clifton Drive North, St. Annes-on-Sea
1896	†Cooper, H. Roland	Works' Accountant, Sopwith Aviation Co., Canbury Park Rd., Kingston-on-Thames
1902	Cowan, Noel P.	H.B.M. Vice-Consul, Isfahan, Persia
1905	Crompton, M. B.	2, Broadway, Coventry
1874	Davies, Dr. Sidney, M.A.	St. Just, Highdown Avenue, Worthing
1909	Dodds, J. H., B.A.	Officer-in-charge, Ekiti Division, via Ashogbo, Nigeria, West Africa
1895	Dugdale, Thomas C.	284, King's Road, Chelsea, London, S.W. 3
1906	Dunn, Albert, B.COM.	Boynteg, Manchester Road, Swinton
1879	Evington, S. D.	6, Cromwell Road, Stretford
